GLOBAL NETWORK SYSTEMS OMNI CLOUD SOLUTION

Per User Package

Omni ACCOUNTS

Global Network Systems was founded in November 1998, with the foremost goal of creating a leading IT Solutions business by utilizing the wealth of knowledge, skills and expertise gained from many years of experience within the industry. GNS being in business over 20 years, with our ever-growing customer base will bear testimony to the caliber of service that we are able to deliver.

Global Network Systems Specialize in Omni Accounts Cloud Hosting.

GNS offers Omni cloud server hosting in our N+1 data centre. We also offer Hosted Exchange and various email solutions that integrate perfectly with your Hosted ERP Cloud Server.

What is Omni Accounts Cloud Hosting?

Omni Accounts is set up and deployed on cloud infrastructure within the our N+1 accredited Datacentre. It is provided to users as software accessible on a PC or Mac through Microsoft Remote Desktop. Our team manages server uptime, backup power, optimal server environment, server maintenance, virus protection, backups, and disaster recovery. You can seamlessly connect and conduct transactions without the need to concern yourself with technical intricacies.

- IT Hardware Sales

Build Standards, Certifications & Compliance

To ensure reliability, we validate our electrical design using the IEEE Availability Study, which identifies potential failure points and builds resilience into our system. As a result, GNS proudly offers a 99.999% uptime SLA, setting a benchmark for continuous power systems' reliability.

Compliance and Security

At GNS, we prioritize the security and compliance of our facilities. We choose to align our standards with recognized non-commercial industry bodies rather than commercial profit-driven organizations. Our facilities undergo rigorous technical vetting by our esteemed clients to ensure they meet design and operating standards.

Our commitment to compliance extends to various industry standards, including:

- **PCI DSS (Payment Card Industry Data Security Standards):** We adhere to the physical security requirements of PCI DSS.
- **ISO 9001:2015 (Quality Management Systems):** We maintain certified quality management systems to consistently meet customer needs.
- **ISO/IEC 27001:2013 (Information Security Management):** We implement internationally recognized best practices for information security management.
- **ISAE 3402 Type 2 Attestation:** Our facilities meet the trust principles of security and availability, as assessed by independent auditors.

Partnering with Global Network Systems.

When you choose GNS, you're not just selecting a cloud hosting partner; you're choosing a trusted ally dedicated to meeting your stringent requirements. Our commitment to excellence, 25 years experience, reliability, and security makes us the ideal choice for hosting your critical data and applications.

As the world relies more on data and connectivity, it's vital that your data centre infrastructure partner can meet rigorous compliance and security standards. GNS, Africa's interconnection and vendor-neutral data centre, has developed a comprehensive compliance program to cater to even the most stringent client requirements.

"Join 100's of local and international organizations who have entrusted their data and critical applications to our N+1 compliant colocation facilities. At Global Network Systems, we are your partner in navigating the digital landscape, ensuring your data remains secure and accessible."

The 7 benefits of working in the cloud.

- **Cost Savings:** A Cloud Hosted solution provides you with scalable computing power, while minimizing your IT hardware & infrastructure requirements and physical data storage, providing you with significant savings.

- **Security:** Perhaps the weakest link in the initial days of cloud adoption is security. Global Network Systems offers enterprise level security and data integrity. Why? Because we take on the risk, and therefore make huge investments in our resources and technology, along with a skilled team of IT experts.

- **Connectivity & Accessibility:** Global Network Systems Per-User Model keep users connected no matter where they work with anytime, anywhere internet access. Users may access files securely anytime, anywhere, using any device that has a stable internet connection. That means no more risk of files being stored or lost on local computers or external hard drives.

Cloud Solution

Global Network Systems
Your cloud business partner

- **Reduced Risk of Data Loss:** Global Network Systems Per-User Model cloud product offers premium security for users by including daily backups with every subscription – ensuring protection against hackers, viruses, ransomware, and other cybersecurity problems. Let's repeat that again, premium protection of your data!

- **Quality Function Deployment:** Global Network Systems Per-User Model cloud solution can be deployed within hours rather than the weeks, months, or years it could take to strategically plan, buy, build and implement your internal server and IT infrastructure.

- **Increased Collaboration:** Cloud computing enables employees situated in various locations to collaborate easily. By providing simultaneous syncing, working, sharing documents and records in real time, the Global Network Systems Per-User Model helps increase the collaboration and efficiency of employees. Many businesses prefer to run their accounting packages in the Global Network Systems Per-User Model cloud, providing a seamless experience for all users accessing the software.

Cloud Solution

Global Network Systems
Your cloud business partner

- **Improved Efficiency:** After migrating to the cloud, you no longer need to worry about processing power requirements, storage considerations, expensive computer hardware, or software updates. You get to keep your entire company focused on generating revenue and relationships, not on IT infrastructure.
- Global Network Systems does all the heavy lifting for your business IT infrastructure with our pre-packaged and scalable Per-User cloud solution.

"Why would you go for the GNS Per User Model?"

- Performs like any Software as a Service cloud application.
- Many of our Omni clients enjoy the peace of mind that comes when hosting their ERP on our GNS Omni Cloud hosted solution.
- Quick Deployment.
- Reliable Backups.
- Guaranteed accessibility & security.

GNS offers cloud server hosting in our N+1 rated data centre. In addition we offer Hosted Exchange and various email solutions that integrate perfectly with your Hosted Cloud Server and 3rd party applications.
